

Our Commercial Team

Name: Verity Kelly

Job Role: Quantity Surveyor

Before joining EKFB, I...

Worked on the fit out of the Crossrail Farringdon station. I studied Construction Project Management at Aston University. Whilst at university I completed trainee site management work placements with multiple companies.

I am responsible for...

Commercially managing a Civils subcontractor. I am also responsible for completing updates for internal and client reporting.

I wanted a career in construction because...

Of the diverse range of projects and roles across the industry. I had studied HS2 at university so wanted to be involved in the project.

My ambitions for the future are...

To become a member of the Royal Institute of Chartered Surveyors (RICS). I am also excited to see how I can develop and progress as part of the HS2 project

My advice for a new starter would be...

If you have a question just ask it – if you aren't clear other people might be unsure as well.

Try and get out on site as much as you can to see how the works are built on site and to see how the project is progressing

Outside of work I like to...

Go running, walking and cycling. I also like to spend time with my friends and family as well as baking
