

# Our Engineering Team

---

**Name: Laurence Hickman**

Job Role: Site Engineer

## ***Before joining EKFB, I...***

After leaving school I gained my BSc and MSc in Civil Engineering from the Universities of Abertay Dundee and Dundee respectively.

Before I joined Kier, I worked on projects such as the Queensferry Crossing and Crossrail.

As part of Kier, I worked on the M6 SMP and gained a diploma in Management.

## ***I am responsible for...***

My responsibilities range from setting out to reviewing design drawings.

I enjoy my job because of the variety and challenges which each day brings.

## ***I wanted a career in construction because...***

I've always enjoyed building things. Having the opportunity to take part in the construction of such a vital piece of our national infrastructure and to leave a legacy in the form of the work we do on HS2 was just too good an opportunity to pass up.

## ***My ambitions for the future are...***

I'm currently working towards my chartered status with the ICE and I'm excited for the many civil engineering opportunities available overseas.

## ***My advice for a new starter would be...***

Embrace the opportunities afforded to you and approach your work in an enthusiastic and open-minded way.

## ***Outside of work I like to...***

I enjoy being outdoors so in my free time I like climbing, kayaking, shooting, and hiking. If the weather isn't appealing, I also enjoy reading and the occasional spot of cooking.
