THE CAREERS & ENTERPRISE COMPANY

LEAN VIRTUAL WORK EXPERIENCE

Free virtual work experience resources
Easy to use packages that give your students an insight into a key sector for London and meet Gatsby Benchmark 6

The first two virtual experience packages from the London Enterprise Adviser Network are now available to download. These feature two key sectors for London, **Digital and Technology** and **Construction**.

Designed to give you control over delivering Gatsby Benchmark 6 activities to your KS4 students. Each package contains 4+ hours of classroom activities that can be delivered with the help of local volunteers from each sector.

## Key benefits:

- Specifically designed to help Careers Leaders meet Gatsby Benchmark 6

- Scalable – The resources can be used with as many class groups as needed.

- Easy to use – Requires minimal preparation from both volunteers and facilitating teachers.

- Flexible – Deliver as a half-day session or across multiple lessons (approx. 4 hours activity). Use computers or deliver using just paper and pen (printing required).

- Enterprise Coordinator support - Our staff can help you plan and recruit volunteers

What the experiences include:

A series of activities to learn more about the sector, including London-wide labour market information

Films featuring people working in the sector, providing insight, inspiration and setting the sector challenge.

A sector themed business challenge that students receive feedback on from a sector volunteer.

Two-way interaction with a volunteer from the sector.

Each package includes:

An interactive facilitator toolkit containing step-by-step delivery guidance

Lesson slides, including all video links and activity prompts

Student logs including all of the activities. Both printable and digital versions are available

A take home information sheet for parents/carers

Editable student certificate

The Challenges:

Digital and Technology KS4	Construction KS4
Working as a team at a digital content agency, students work together to design and pitch an app that connects young people to volunteering opportunities around London. They then pitch their app to a volunteer from the sector.	Working as a team at a construction company, students design and cost a building that will bring different members of their local community together and pitch their idea to a local volunteer from the construction sector. Includes links to the Mathematics curriculum.
Featured roles:	**Featured roles:**
Product Manager User Experience Designer Marketing Manager Data Engineer	Quantity Surveyor Architect Community Engagement Manager Project Manager
