

YEAR 8 LMI LESSON 1

EMPLOYMENT SECTOR LESSON PLAN

Statistic discussion starter: (5 minutes)

This series of lessons sits within the 'Global Challenges' Unit and as such, students have been looking at population growth and population pressures. Discuss challenges and opportunities an ageing population might bring.

Starter: (5 minutes)

NEET (Not in Employment Education or Training) statistics – highlight another issue locally in the North East is the level of NEET – how can this be?

More statistics: (5 minutes)

Students assess the employment statistics i.e. per employment sector, in the locality – jobs are out there why such high NEET? Discussions likely to be politically fuelled, students should be reminded of bias in the media and that they need to look at statistics.

Employment sector statistics: (36 minutes)

For each of the 9 employment sectors, students should summarise the statistics. (Students will gain this information via an information hunt around the classroom).

Plenary: Diamond 9: (5 minutes)

Rank the employment sectors into which students feel are the most important to our locality to the least important. It is important that students justify their opinion for the top and bottom positions.
