

Analyse – What other roles could help you?

Now that you have a proposal and design concepts, what other jobs and skills might help you with the implementation of this social housing project?

Complete your research by looking at the different roles and discuss:

1. Which roles and skills will help delivery the next stage of the project?
2. Which 3 roles out of the 6 would you choose to collaborate with and what are the reasons for this?

Town Planner

A **Town Planner** is responsible for supporting communities and local government to decide on the most effective way to use land and buildings. A Town Planner aims to achieve sustainable solutions which involves balancing different social, environmental and economic issues when decisions are made on whether a piece of land can be built on.

Key skills

- Good written and verbal communication
- Knowledge of geography
- Teamwork
- Organisation
- Ability to work on multiple projects simultaneously
- Attention to detail
- Project management

Interior Designer

An **Interior designer** is responsible for creating initial design concepts and space planning proposals and material specifications. They make indoor spaces functional, safe, and beautiful by working out space requirements and selecting essential and decorative items, including colours, lighting, and materials.

Key skills

- Creativity and imagination
- A talent for drawing/sketching
- Awareness of sustainable practices
- Knowledge of construction
- Ability to use initiative
- Inventive approach
- Attention to detail
- Teamwork

CAD Technician

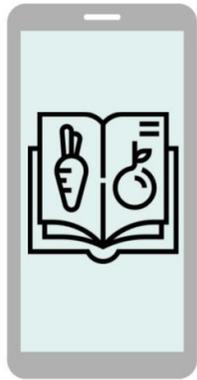

A **CAD technician**, is responsible for creating technical drawings and plans – using specialised digital software – for products and components used in the engineering, construction and manufacturing industries.

Key skills

- Engineering
- Creativity and design
- Numeracy and mathematics
- Knowledge of materials and manufacturing processes
- Good communication
- Adaptability
- Attention to detail
- Ability to collaborate

Recipe Developer

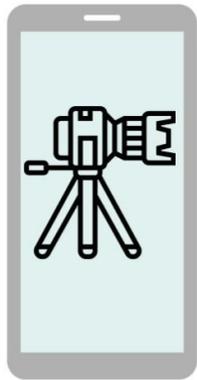

Recipe developers are responsible for creating **innovative** recipes, sometimes alongside a chef. Sometimes they work on developing new or improved recipes for individuals with specific health or dietary concerns. They can also be hired to come up with new recipes for restaurants or food manufacturers, or to develop recipes for websites or blogs.

Key skills

- Creativity & innovation
- Extensive cooking experience
- Sense of taste and smell
- Determination & patience
- Organisation
- Good communication

Architectural Photographer

Architectural Photographers take photographs of buildings and structures, often for commercial purposes. This could be for use in a marketing brochure, exhibition or advertising. Photographers may choose to specialise in one area such as, retail, residential, commercial or interior architecture.

Key skills

- Creativity
- Technical knowledge of camera equipment and processes
- Patience and concentration
- Attention to detail
- Teamwork
- Ability to network

Task

Look at the roles and discuss:

1. Which roles and skills will help delivering the next stage of the project? Explain.

2. Which 3 roles out of the 6 would you choose to collaborate with?

3. What are the reasons for selecting these 3 roles?
