

# Year 9 Geography

## Worksheet 3

**How would people working in other roles work with Aaron to produce the environmental report?**

How would each role help Aaron in planning or delivering the report?

Give each role a rank from 1 – 5 to say how important they would be in the process

Job role	How could someone in this role help Aaron with his report?	Rank in order of importance for Aaron. 1 = most important 5 = least important
<p><b>Land use surveyors</b> collect and analyse data to map the land for engineering and construction projects. They also carry out surveys to identify the potential effects of construction on the environment.</p>		
<p>A <b>grant writer</b> completes the application process for obtaining financial grants. Grants are funds provided by charities, foundations, local government, or national government.</p>		
<p><b>Urban planners</b> assess the potential impact of new rail links or roads, plan for new housing, redesign urban spaces and develop parks, woodlands and waterways in a sustainable way. They assist local and national governments with planning and advise businesses and the public on planning rules.</p>		

# Worksheet 3

Working for river trusts or charities, **project officers** run the work of the organisation and help decide how funds should be allocated. They might specialise in urban or rural flood management, habitat enhancement or water quality.

A **public relations director** plans and delivers communications campaigns. They raise awareness of organisations and their aims.

They communicate messages through online, print and broadcast media and manage relationships with clients' agencies.
